Udbhav'10

Sir,

We are pleased to announce that the **Annual All India Chemical department festival *Udbhav '10*** is scheduled to be held from 26th to 27th march 2010.

Every year **UDBHAV** showcases paper presentation, poster making, guest lectures and a host of other competitive events which includes those related with chemical engineering, general aptitude and a series of informal events.

We realize that your contribution for ***Udbhav'10*** will give the students a morale boost and encourage them to present their ideas.

We at Department of Chemical Engineering, ITBHU are planning to hold a myriad of interesting events so as to bring forward the real essence of a chemical engineer.

UDBHAV is the annual chemical festival to display various aspects, ideas, progress and happenings in the field of chemical engineering and technology. It will include several events that will fulfill above aims. The stage is set and the time has come for the nerds to gear up for the exciting events.

Chemical Engineering and Technology. This will bring out creative as well as intelligence of the budding chemical engineers.

PAPER PRESENTATION:

It will have power point presentation on some innovative and challenging ideas in the field of Chemical Engineering. The paper presented would essentially be a study or some new ideas propping up in the intelligentsia.

CHEMBIZZ:

The Chembizz reaches out to all business-minded Chemical Engineers, forcing them to use their grey cells to study the given case. You are essentially a business analyst, working out the shortcomings and strengths of the company whose case will be presented to you. You will try to figure out the company's financial and marketing profile, and what it should do to have a good profit making streak, not just in the short run, but in the long run too.

Informals

We plan to conduct different quizzes, online puzzles so as to sharpen the brains. The quizzes would be based on general aptitude and chemical engineering. Also there is a plan to incorporate questions related latest developments in chemical engineering field.

SPORTS

Education rests in a healthy mind and a healthy body. This aim is accomplished by holding different inter year competitions viz. cricket, football, volleyball, badminton, table tennis.
